ABOUT SAP PP

SAP Production Planning (SAP PP) is the component of ERP Central Component (ECC) that helps businesses plan the manufacturing, sale and distribution of goods. A part of SAP ECC's logistics function, SAP PP plays a vital role in a manufacturer's supply chain and integrates with other ECC components, including Materials Management (MM), Sales and Distribution (SD), Plant Maintenance (PM), Quality Management (QM), Finance (FI), Controlling (CO) and Human Resources (HR).

SAP PP sub-modules include sales and operations planning (S&OP), long-term planning (LTP), data management (DM), master production schedule/material requirements planning (MPS/MRP), capacity requirements planning (CRP), shop floor control and information systems.

WHY NETTECH INDIA ?

- Free Complete Placement Training
- Career Growth - Higher Pay & Position
- Encourages Professional Development
- Enhances Professional Credibility
- Internship Assistance
- Free Demo Class
- Certified Course
- Excellent Training with Qualified Trainer
- 50+ Case Studies
- 10+ Projects

Introduction

- Introduction to ERP
- Introduction to SAP
- Organization Structure in SAP ERP
- SAP Implementation Methodology
- Plan to Procure Process
- Order to Cash Process
- Plan to Production Process
- Financial Implication of Procurement, Production and Sales

Basics Data for Production

- Organizational data related to production planning and manufacturing
- Creating material master data and views required to support discrete and Managing changes to the material master
- Functions and features of bills of material (BOMs) in details
- Standard BOM Functions
- BOM maintenance and Reporting

- Work center master data and views required to support discrete manufacturing
- Capacity Data
- Scheduling Data
- Functions and features of Discrete manufacturing
 - Task lists (standard routings) in details
- Routing sequences
- Operational Details
- Task list Maintenance and reporting

Production Planning in ERP

- Overview of Production Planning in SAP ERP
- Outlining the Supply Chain Planning Process
- Outlining the Core Production Planning Process
- Demand Management
- Outlining Demand Management
- Planning Make-to-Stock Production Without Consumption Logic
- Planning Make-to-Stock Production with Consumption Logic
- Analyzing Availability Checks
- Material Requirements Planning Execution
- Outlining Material Requirements Planning

- Setting Up the MRP Run
- Planning MRP Interactively
- Applying Firming Mechanisms
- Technical Processes of Requirements Planning
- Calculating Net Requirements
- Applying Buffers in Net Requirements Calculation
- Calculating Lot Sizes
- Selecting Procurement Types
- Setting Up Basic-Date Scheduling
- Setting Up Lead-Time Scheduling
- MRP Results Processing and Evaluations
- Comparing an MRP List and a Stock/Requirements List
- Identifying Exception Messages
- Additional MRP Processes
- Setting Up MRP Areas
- Applying MRP Areas

Production Orders:

- Order structure and processing
- Order creation
- Availability checks
- Capacity Requirements Planning (Basics)
- Order release
- Material withdrawal
- Confirmations
- Goods receipt
- Order settlement
- Archiving and deletion
- Mass Processing and Information Systems

Capacity Planning (ERP)

- Integration of capacity planning
- Analysis of capacity requirement
- Maintenance of available capacity
- Capacity Leveling

Other manufacturing Process Overview

- Repetitive Manufacturing
- Process Manufacturing
- KANBAN
- SAP PP Integration with Other Modules
- SAP PP-SAP MM
- SAP PP-SAP SD
- SAP PP-SAP FICO

CAREER OPPORTUNITIES

- SAP PP Developer
- SAP PP Expert
- SAP PP Consultant
- SAP PP Analyst
